Daycare Surgery Process

BENEFITS OF DAY CARE SURGERY

- ◆ Early mobilization (walking around) because anaesthesia wears out faster than conventional drugs
- ◆ Less pain because of safer and longer acting drugs and minimally invasive surgical techniques
- ◆ Patient satisfaction is 100%
- ◆ Early return of patient to their home environment – means easier domestic arrangements. Reduced risk of cross infection in hospitals. Earlier return to work means **less loss of pay**
- ◆ Clinician team working real time resulting in a more accurate treatment
- ◆ The service is cost-effective in a long term
